Drug Name: K-PHOS ORIGINAL

What is this medicine?

PHOSPHORUS SALTS (FOS fer uhs sawlts) is used to treat high pH levels in the urine. It is used to prevent calcium kidney stones. This medicine can also work with some antibiotics for urinary tract infections.

This medicine may be used for other purposes; ask your health care provider or pharmacist if you have questions.

How should I use this medicine?

Take this medicine by mouth. Follow the directions on the package or prescription label. Dissolve this medicine in 6 to 8 ounces of water as directed. Allow tablets to soak in water for 2 to 5 minutes or more. If part of the tablet does not dissolve, it may be crushed and then the solution stirred vigorously. Shake or stir well before taking. Take your medicine at regular intervals. Do not take your medicine more often than directed. Talk to your pediatrician regarding the use of this medicine in children. Special care may be needed.

Overdosage: If you think you have taken too much of this medicine contact a poison control center or emergency room at once. NOTE: This medicine is only for you. Do not share this medicine with others.

What should I tell my health care provider before I take this medicine?

They need to know if you have any of these conditions: high levels of calcium in the blood high levels of phosphate in the blood kidney disease phosphate stones an unusual or allergic reaction to phosphorus salts, other medicines, foods, dyes, or preservatives pregnant or trying to get pregnant breast-feeding

What if I miss a dose?

If you miss a dose, take it as soon as you can. If it is almost time for your next dose, take only that dose. Do not take double or extra doses.

Where should I keep my medicine?

Keep out of the reach of children. Store at room temperature between 20 and 25 degrees C (68 and 77 degrees F). Protect from light. Throw away any unused medicine after the expiration date.

NOTE: This sheet is a summary. It may not cover all possible information. If you have questions about this medicine, talk to your doctor, pharmacist, or health care provider.

What should I watch for while using this medicine?

Visit your health care professional for regular checks on your progress. Your doctor may order blood work while you are taking this medicine. You may pass a kidney stone after starting this medicine. Contact your doctor if you have new or unusual symptoms. Avoid products with aluminum, calcium, magnesium as these may bind to this medicine.

What side effects may I notice from receiving this medicine?

Side effects that you should report to your doctor or health care professional as soon as possible: allergic reactions like skin rash, itching or hives, swelling of the face, lips, or tongue bone or joint pain breathing problems confusion fast, irregular heartbeat feeling faint or lightheaded, falls heaviness in the legs high blood pressure muscle cramps tingling, pain, or numbness in the hands or feet unusually weak or tired Side effects that usually do not require medical attention (report to your doctor or health care professional if they continue or are bothersome): diarrhea nausea, vomiting stomach pain

This list may not describe all possible side effects. Call your doctor for medical advice about side effects. You may report side effects to FDA at 1-800-FDA-1088.
